

Part IV – Evaluation

REDC seeks to evaluate our 2011 plan for the purpose of determining our success in meeting both our goals as well as EDA priorities. This evaluation component will be fairly broad in addressing each of these areas, while specific enough to quantify the results achieved by the Rockingham Economic Development Corporation Region.

REDC established an evaluation methodology that focused upon quantitative and qualitative measures related to program performance.

A. Documentation of CEDS Process

REDC utilizes the EDA Guidelines and recommendations for developing the CEDS document. The first step in the process was to create the 2011 CEDS Steering Committee (outlined in Part I of this document). The committee was expanded to meet the needs of the growing CEDS region. The Steering Committee met several times throughout the CEDS process, providing valuable input and feedback into the development of this document. REDC contacted staff from both inside and outside its own organization to provide the necessary data, maps and text to create the written document. The staff worked closely with the Steering Committee to complete the 2011 CEDS.

B. Evaluation of Past 12 months

1. Evaluation of CEDS Process

Levels of Participation

Goal: *To encourage a high level of participation in CEDS activities by a diverse group representative of both municipal and business leaders.*

The REDC CEDS Steering Committee had four regular meetings this year which were attended by an average of twenty individuals. These meetings were attended by a broad cross section of private business persons, municipal employees, economic development and planning practitioners as well as elected officials. REDC surveyed both the CEDS Steering Committee as well as the 42 communities we serve in order to develop future initiatives which would be most helpful to our Region, such as municipal sharing.

In addition to the Committee meetings, numerous presentations were made throughout the Region. REDC also hosted the EDA Assessment Team Visit in May 2011. This visit spanned three days and totaled 160 participants from across the Region and State.

Data Development and Dissemination

Goal: *To provide comprehensive data and other statistical analysis tools for the region's economic development stakeholders; and to have that body of work "recognized" as an all-inclusive source of current information on each of the towns that comprise the region.*

Through the development of the CEDS, REDC maintains current and accurate demographic and other data on all towns, projects, available real estate sites, and companies in the region. This data is gathered from both the Rockingham Planning Commission (RPC) and the Nashua Regional

Planning Commission (NRPC) and is compiled by REDC's Planner into the comprehensive information contained in the CEDS.

Development of the 2011 CEDS included reporting on the new 2010 U.S. Census data. The CEDS contains valuable data that is used by municipalities and private firms to assist in grant applications, budgetary requests, and marketing plans.

The Region is positively impacted by the availability of the REDC CEDS, which brings together many different types of data and analysis. It is a unique tool that gives the Region an advantage in economic development and with securing funds. The communities, in turn, disseminate the data to the stakeholders. The comparison Census data has broad economic impact as the 42 communities in the CEDS territory seek to attract jobs and provide workforce housing.

Marketing and Outreach of CEDS

Goal: *To promote the use of the CEDS document by the region's economic development stakeholders as a resource in the region, as well as a "blueprint for success."*

Hard copies and/or electronic copies of the 2010 CEDS 5 year review and annual report were mailed to each community within the CEDS region, the CEDS steering committee, the REDC Board of Directors, and state and federal funding agencies. In addition, we make the current CEDS, charts and graphs and several past CEDS available on the REDC website.

REDC promotes and makes available on its website any of the special reports generated from the CEDS such as the "2010 U.S. Census" and the "State of the Economy: 2011" as well as any reports we receive from the EDA.

In addition, REDC distributes printed materials on the CEDS process in our marketing material that is given to clients, commercial lenders and attendees at business expos and other economic development events.

2. Evaluation of CEDS Goals

Economic Development

Goal: *To create high-skill, higher-wage jobs within innovative clusters as a means to diversify the regional economy and improve the economic conditions in the area.*

REDC has aided in the creation and/or the retention of thousands of jobs through our Regional revolving loan fund. EDA funds have also been used for public works projects to create jobs within the Region. This year REDC assisted with compiling the NH Innovation Commercialization Center (ICC) EDA application. This organization provides incubation type services to expanding start-ups and high tech companies which create the higher skilled, higher wage, jobs we need in our Region.

REDC has assisted numerous regional businesses with technical assistance and financing such as: Resonetics, Firefly, Integron and Case Continuum. The assistance to the companies has helped strengthen the economic development of the Region and create higher skilled, higher wage jobs.

Infrastructure Development

Goal: *To invest in infrastructure improvements, such as roads, bridges, sewers, water facilities and broadband, and multi-modal transportation systems that will strengthen and diversify the regional economy.*

Improved and expanded infrastructure leads to increased private investment and attention to environmental issues. For example, the Town of Seabrook started a project that will assist with the widening of the bridge over Route 107 and I-95 to accommodate future growth on Route 1, the commercial district of the town. This project is being funded in a large part by private commercial developers. Also, the Community Technical Assistance Program (CTAP) is available to assist communities impacted by I-93 widening. In addition, the I-93 Transit Investment Study addresses alternative forms of transportation for southern New Hampshire and northern Massachusetts along I-93.

REDC submitted an application for an EDA Public Works Grant for the Pettengill Access Road project in Londonderry NH. This project, and subsequent development, will result in the creation of 4,000 – 6,000 new jobs.

REDC encouraged the submission of new Priority Projects from towns that have previously indicated some degree of distress, and new infrastructure projects have been added to the Priority Project List each year. This year resulted in the addition of nine new infrastructure projects added to the CEDS Priority Project list. Six of the projects are from the Town of Stratham, which involves new water and waste water treatment facilities. The ability to address water treatment on a regional basis, such as shared services between Exeter and Stratham NH will reduce the overall cost consumers pay and improve the overall infrastructure on a coordinated basis.

The overall impact of this goal is to enhance the infrastructure in the region, which leads to increased economic development opportunities. Although many of these projects are funded through sources other than EDA, they provide direct benefits to the region in creating jobs and increasing the tax base for local communities.

Regional Cooperation

Goal: *To develop cost-effective regional solutions to local problems as a means to improve municipal budgets and maintain the quality of life in the Region.*

REDC supports regional cooperation through the study of sharing of key (and usually costly) municipal services. The most recent example of this is participation in discussions between Exeter and Stratham NH on water and

wastewater sharing. The success of the region will depend on those areas of common interest. REDC encourages communities to work together to address common problems through a regional solution. RPC continues to host its Municipal Forums to encourage collaboration among local communities.

REDC has been working with officials throughout NH to strategize on municipal sharing with a particular focus on water/sewer services as this lack of infrastructure is a barrier to development. Representatives from numerous communities have shared their ideas on regionalism and shared services ranging from shared administrative staff to sharing emergency services. Regional infrastructure projects are necessary to limit the financial burden on individual communities and to encourage economic development and private investment.

Workforce Development

Goal: *To leverage the resources available through the workforce development and university/community college systems to address the growing skill needs of the business community and regional workforce.*

REDC matches workforce development needs of biotech, manufacturing and software development firms with workforce development agency or educational institution. We continuously work with the NH Department of Resources and Economic Development (DRED) to promote the NH Job Training Fund which can provide up to a 50% match for job training.

REDC supports the University of New Hampshire's (UNH) efforts to develop our workforce through their programs including the Green Launching Pad and the Innovation Commercialization Center (ICC) at Pease Tradeport.

Workforce Housing

Goal: *To develop diversified workforce housing options for all income levels to ensure the availability of workers for expanding businesses and new firms in the Region.*

REDC and RPC have supported the ongoing efforts of the Workforce Housing Coalition to educate and inform the public through public forums and monthly meetings on the importance of workforce housing to the region's economy.

REDC assists and provides support with the development of a workforce housing plan for the State of NH through the New Hampshire Housing Finance Authority of which Laurel Bistany, Executive Director of REDC, now sits.

REDC has focused upon the need for more workforce housing as an economic development issue. Firms that are relocating and/or expanding are finding it difficult to attract workers due to the limited affordable housing opportunities. The 2010 Census highlights that workforce housing continues

to be a problem in this area, particularly on the seacoast. NH has a disproportionate amount of expensive owner-occupied housing verses rental units.

The Workforce Housing Coalition (WHC) is currently exploring development of workforce housing at the former Alrose Shoe Facility in Exeter NH in partnership with Rockingham Planning Commission and REDC. This important project was added to the 2011 CEDS Priority Project list. REDC co-sponsored the WHC's most recent event at the Newmarket NH Mills.

Environmental Preservation

Goal: *To maintain the unique qualities of life in southern New Hampshire through the preservation of natural and historic resources and a balanced approach to economic development.*

Several towns are adopting green ordinances and focusing on taking advantage of incentives for putting efficiencies in place. New projects such as the Innovation Commercialization Center (ICC) in Portsmouth NH are promoting high tech and green jobs.

REDC has been promoting our new Brownfields RLF throughout the Region as a means of ensuring a clean environment and in some cases promoting green space. REDC plans to focus upon "green" and marine industries as emerging technologies for the future. REDC continues to work extensively with the Brownfields Advisory Committee through the regional planning commissions. The preservation of open space and historic buildings maintains the quality of life in the region.

The State of New Hampshire is making a concerted effort to preserve open space. Region residents support open space preservation in order to provide balance to the business development. Without the appropriate balance between economic development and quality of life issues, the region will be less attractive for private investment.

3. Evaluation of CEDS Projects

The goal of the Priority Project list is to identify significant economic development projects in the Region. The list is updated each year. Significant work has been done on several of the projects on the Project List over the past 12 months, and the Priority Project list has been a successful tool in obtaining funding for key projects.

In Derry, work has started on sections of the Rail Trail and the Town of Derry approved a bond to start work on the Route 28/Manchester Road widening project. The Squamscott Community Commons project received a one million dollar federal appropriation. The fact that this project is on the Priority Project list was instrumental in obtaining the appropriation.

An EDA application was submitted for the Smuttynose project in Hampton. The project was awarded \$250,975 for off-site sewer improvements. Construction is set to begin in 2011.

In Newmarket, the Lamprey River Mill Re-Development project is underway. Final permitting was completed, funding secured, and construction has begun on the mill. The first tenant moved in, and other tenants are committed. The apartments are expected to be ready in the fall of 2011.

The development of a rail station in Plaistow has made significant steps in the past 12 months. Discussions with MBTA and other key players continued. The current project has \$8.4 million CMAQ funding, including approximately \$1.6 million in local match funds to be provided by the MBTA. This project was moved from the Intermediate to Short Term priority list.

Both the Route 107/I-95 Bridge Expansion and Route 1 expansion projects in Seabrook are ready to begin. Critical agreements with a developer and NHDOT were finalized, allowing for funding to be made available.

C. Evaluation Criteria for 2011-2012

The REDC staff and the CEDS Steering Committee will evaluate our performance based on:

- Goal attainment; did we make measurable progress in each of our six priority areas;
- Adherence to EDA policies and priorities;
- Submission of timely and complete reports;
- Progress towards completion of the 2011-2012 Short Term Action items listed in this CEDS;
- An active and engaged Steering Committee.
