To access the trial, start walking down the driveway for the business 3CI, and on your right will be a wooden railing.

When the railing ends, you will see the path entering the woods on your right. Follow this path and bear left at every option, and after .25 miles you will be on Western Front, which is marked with blue blazes.

After crossing a bridge and a short climb, bear left at the rocks to start the "U loop" onto the point. After the U turn, a short/easy scramble off the trail down to the left will take you to "lookout rocks" which provides a great view of the marsh.

Continue following Western Front another .5 mile as it winds through various rock formations until after a short climb you bear left towards route 101 on the yellow trail.

Continue following the yellow trail another .3 miles, making sure to bear right across the short bridge (do not continue down Deene's Dream). On your right will be some steep cliffs known as "Camel's Hump".

Continue on the yellow trail until it joins with the blue/green trail which will take you past the original "Fort Rock" formation on your left, (which are fun to climb on). Bear right onto the blue trail, which will take you back to 3CI and you can retrace your path back to the car.
