GOT QUESTIONS?

What's the cost of installing a home charger?

How far can an EV go between charges?

How long does it take to charge?

How long do EV batteries last?

MORE ON THE
OTHER SIDE

ELECTRIC VEHICLE ASSOCIATION Quick EV Facts

HOW FAR CAN AN EV GO BETWEEN CHARGES?

Most current EVs have a range of 200 to 500 miles with the average EV having a range of 270 miles.

HOW LONG DOES IT TAKE TO CHARGE?

Charge an EV in as little as 15-20 minutes. This varies depending on the battery type, current state of charge, charger being used. Average 30 minutes for a fast charger or overnight at home.

WHAT'S THE COST OF INSTALLING A HOME CHARGER?

Installing an EV home charger can range from \$400-\$1,500+ for the electrician and unit itself. You can also use a 220 dryer outlet or even a 110 outlet.

HOW LONG DO EV BATTERIES LAST?

Most EV batteries will last 10 to 20 years and can be recycled for a second life. EV batteries have an 8 year/100,000 mile minimum warranty.
