Re: Phase I Environmental Property Assessment
23 Water Street
Exeter, New Hampshire
Ardent File ECLP-1608

Mr. Berkowitz:

Ardent Group, Inc. (Ardent) is pleased to present this Phase I Environmental Property Assessment for property referenced as 23 Water Street, Exeter, New Hampshire (the property).

Ardent appreciates the opportunity to assist you with this transaction. Feel free to schedule a debriefing meeting, which may be conducted at your office, by telephone, or by WebEx.

Sincerely,

Ardent Group, Inc.

Joseph Dorsett, Jr.
President

Martina Drew
Environmental Scientist

1.0 EXECUTIVE SUMMARY

1.1 Purpose

Ardent Group, Inc. (Ardent) has conducted a Phase I Environmental Property Assessment for property referenced as 23 Water Street, Exeter, New Hampshire (the property). There are five purposes of this assessment. First, provide an objective third party opinion as to the environmental status or condition of the property. Second, identify recognized environmental conditions, if any. Recognized environmental condition means the presence or likely presence of any hazardous substances or petroleum products on the property under conditions that indicate an existing release, past release, or material threat of release. Third, recommend additional testing or investigation warranted by the findings of the assessment, and provide cost estimates for such recommendations. Fourth, gather preliminary information regarding the compliance of the property with applicable environmental laws, regulations and permits. Fifth, qualify the client for Landowner Liability Protection offered by the Small Business Relief and Brownfields Revitalization Act of 2001.

1.2 Scope of Services & Methodology

This Phase I Environmental Assessment was completed consistent with professional practices established in the field of environmental science, the ASTM International Phase I Environmental Assessment Process ASTM E 1527-21, United States Environmental Protection Agency 40 Code of Federal Regulation 312 Standards & Practices for All Appropriate Inquires, United States Small Business Administration Standard Operating Procedure SOP 50 10 (5) I pursuant to Part 120 of Title 13 of the Code of Federal Regulations.

This assessment was completed such that the client may qualify for protections pursuant to United States Environmental Protection Agency 40 Code of Federal Regulation 312 Standards & Practices for All Appropriate Inquires. As such, All Appropriate Inquiries were developed and performed. See Appendix E for details.

1.3 Environmental Professional Conducting the Assessment

The assessment was conducted by Joseph Dorsett, Jr.; President, Ardent Group, Inc. Mr. Dorsett meets the definition of "Environmental Professional" pursuant to United States Environmental Protection Agency 40 Code of Federal Regulation 312 Standards & Practices for All Appropriate Inquires. See Appendix G for details.

1.4 Primary Findings

The primary findings of this assessment include:

- 1.4.1** The property is comprised of one rectangular-shaped land parcel totaling 0.07 acres. The property address is 23 Water Street, Exeter, New Hampshire.
- 1.4.2** The property vicinity is characterized as moderately populated mixed residential and commercial use. Water Street was developed for residential and commercial use before the turn of the 20th Century.
- 1.4.3** The property is currently an unimproved lot.
- 1.4.4** Historically, the property was improved with a residential dwelling from approximately 1978 to the 1990s, when the building was razed following a fire. The property was an unimproved lot from 1973 to 1978. The property was improved with a commercial building from the 1880s to 1973. The property was unimproved prior to the 1880s.
- 1.4.5** The property is currently unoccupied.
- 1.4.6** Historically, the property was occupied by commercial use tenants from 1927 to the 1972. The property was unoccupied from 1972 to 1978. The property was occupied by residential use tenants from 1978 to the 1990s. The property has been unoccupied since the 1990s. Historic commercial use tenants in possession include a grocery store and a sawmill. The property was unoccupied prior to at least the mid-1880s.
- 1.4.7** 115 Environmental Records were identified within ASTM search radii. 62 of these records are for 37 addresses located within 0.25 miles of the property. None of these Environmental Records are for the property. Four (4) of the addresses are potentially hydraulically connected to the property.
- 1.4.8** Underground Storage Tanks were not identified or reported during the property inspection.
- 1.4.9** Aboveground Storage Tanks were not identified or reported during the property inspection.
- 1.4.10** Oil and hazardous materials (OHMs) were not identified during the property inspection.

1.5 Conclusion

Findings of this Phase I Environmental Property Assessment reveal the site has a Low Environmental Risk Rating. These conclusions are based upon Primary Findings detailed above, and other findings detailed throughout the report.

1.6 Recommendations

There are no recommendations for additional assessment activities at this time.

1.7 Property Transfer Requirements

The State of New Hampshire and the Town of Exeter do not have property transfer requirements.

2.0 PROPERTY DESCRIPTION

2.1 Property Location & Assessor's Reference

A review of Figure 1 reveals the property is comprised of one rectangular-shaped land parcel totaling 0.07 acres. The property address is 23 Water Street, Exeter, New Hampshire. The Parcel ID is 72-39. See Appendix A for details.

FIGURE 1 – Tax Assessor's Map

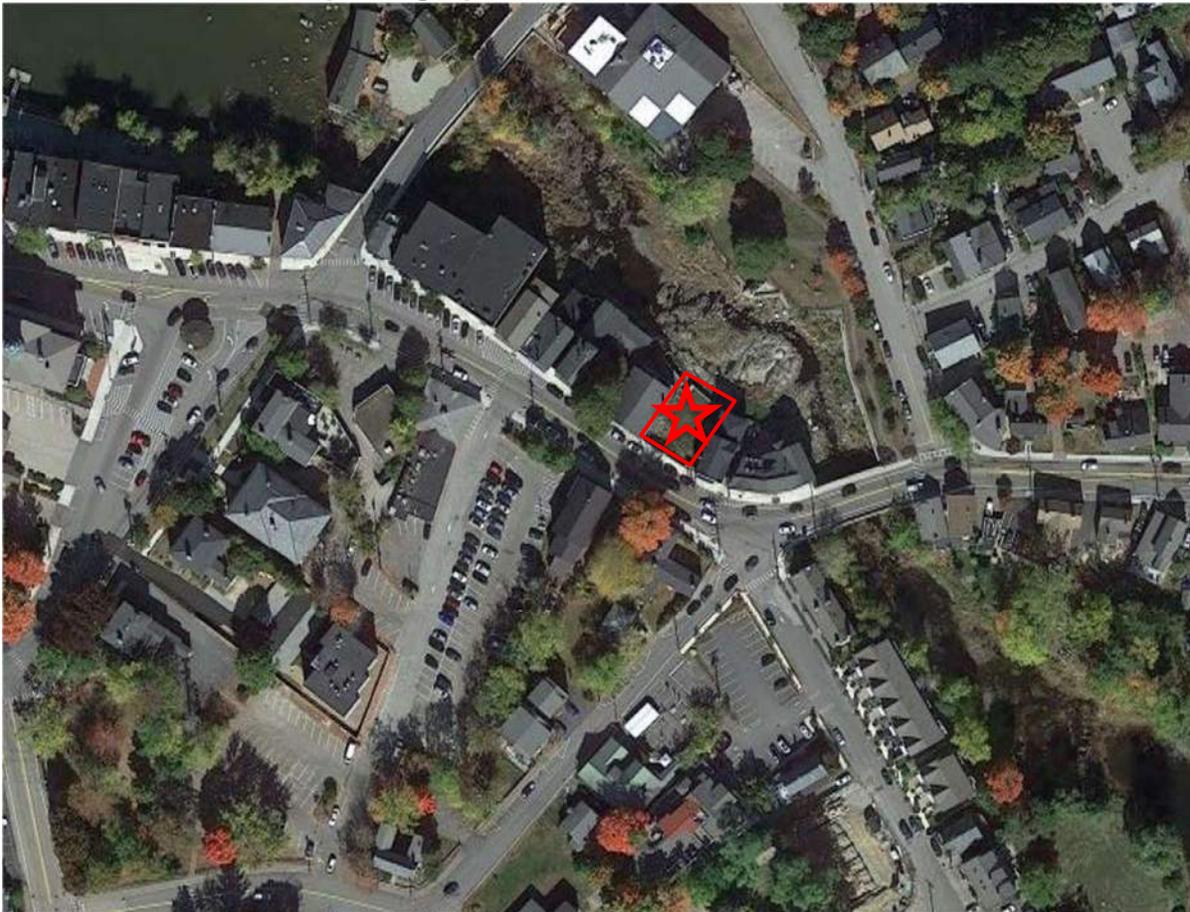

2.2 Property Improvements

A review of Table 1, Figure 2, and accompanying photographs, reveals the property is currently an unimproved lot. Historically, the property was improved with a residential dwelling from approximately 1978 to the 1990s, when the building was razed following a fire. The property was an unimproved lot from 1973 to 1978. The property was improved with a commercial building from the 1880s to 1973. The property was unimproved prior to the 1880s. See Appendix A and B for details.

TABLE 1 - Structures & Improvements

DATE	ADDRESS	IMPROVEMENT	DESCRIPTION	SIZE
<2000s - Present	23 Water	Unimproved Lot	Unimproved Lot	--
<1978-1990s	23 Water	Residential Dwelling	Unknown	Unknown
1973 - 1978	23 Water	Unimproved Lot	Unimproved Lot	--
1885 - 1973	23 Water	Commercial Building	Saw Mill, Grocery Store, Antique Shop	Unknown
< 1885	23 Water	Unimproved	Unimproved	--

FIGURE 2 – 2021 Orthophotograph

2.3 Tenants in Possession & Property Use

A review of Table 2 and accompanying photographs reveals the property is currently unoccupied. Historically, the property was occupied by commercial use tenants from 1927 to the 1972. The property was unoccupied from 1972 to 1978. The property was occupied by residential use tenants from 1978 to the 1990s. The property has been unoccupied since the 1990s. Historic commercial use tenants in possession include a grocery store and a sawmill. The property was unoccupied prior to at least the mid-1880s. See Appendix B and E for details.

TABLE 2 - Tenants in Possession & Property Use

DATE	ADDRESS	TENANT IN POSSESSION	USE
1990s – Present	23 Water	Unoccupied	Vacant Lot
1978 – 1990s	23 Water	Residential Tenants	Residential
1972s – 1978	23 Water	Unoccupied	Vacant Lot
1885 – 1972	23 Water	Commercial tenants in possession including John Rogers & Pease Ernie Jr, Sawmill, Grocery Store	Commercial Use
< 1885	23 Water	Unoccupied	Unoccupied

2.4 Property Vicinity Characteristics

The property vicinity is characterized as densely populated mixed residential and commercial use. Water Street was developed for residential and commercial use before the turn of the 20th Century.

3.0 PROPERTY HISTORY

3.1 Information from Property Representative

Mr. Elliot Berkowitz, property representative, was interviewed regarding historic use, storage, generation or release of oil and hazardous material, and presence of lead-based paint and asbestos-containing material at the property. Mr. Berkowitz did not have knowledge of historic use, storage and generation of oil and hazardous material on the property. Mr. Berkowitz did not have knowledge of the historic presence of lead-based paint or asbestos containing material at the property. Last, Mr. Berkowitz did not have knowledge if the purchase price included consideration of any sort due to the known or suspect presence of oil or hazardous materials.

3.2 Municipal Records

Municipal records, including Assessor's, Building Department, and Board of Health were reviewed to the extent available. Records reveal a history of residential use dating back to the mid-2010s. See Appendix A for details.

TABLE 3 - Ownership Records

ADDRESS	DATE	DEED BOOK/ PAGE	OWNER
23 Water	07/30/2018	5933/2529	PAIRPOINT GROUP LLC
23 Water	03/09/2010	5096/2381	WAXOLWORX INC
23 Water	None Provided	3078/2475	WAXOLWORX INC

3.3 Topographic Maps

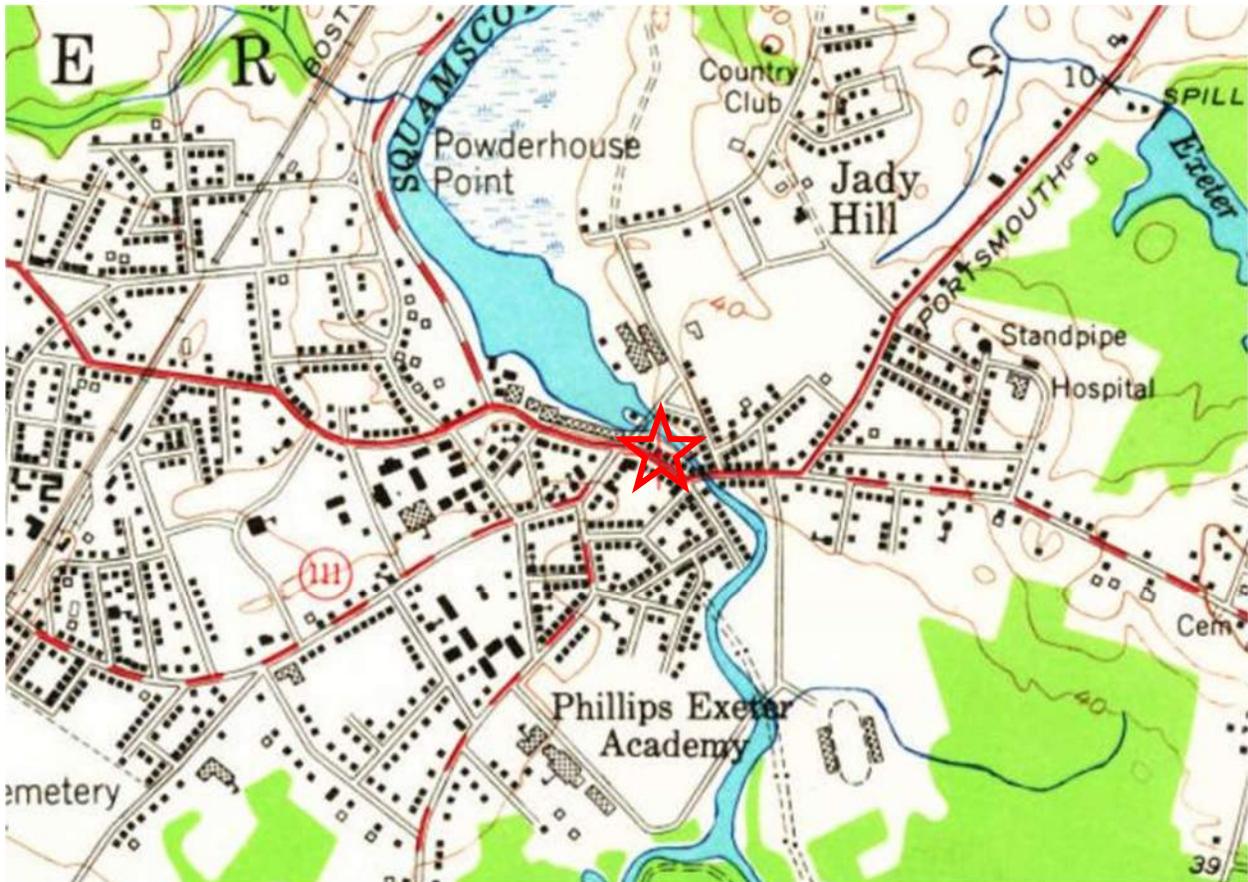

The 1932 United States Geological Survey (USGS) topographic map depicts the property as improved for commercial use. The property vicinity is depicted as moderately populated mixed residential and commercial use.

Figure 3 – 1932 USGS Topographic Map

The 1950 USGS topographic map depicts the property as improved for commercial use. The property vicinity is depicted as densely populated mixed residential and commercial use.

Figure 4 – 1950 USGS Topographic Map

3.4 Orthophotographs

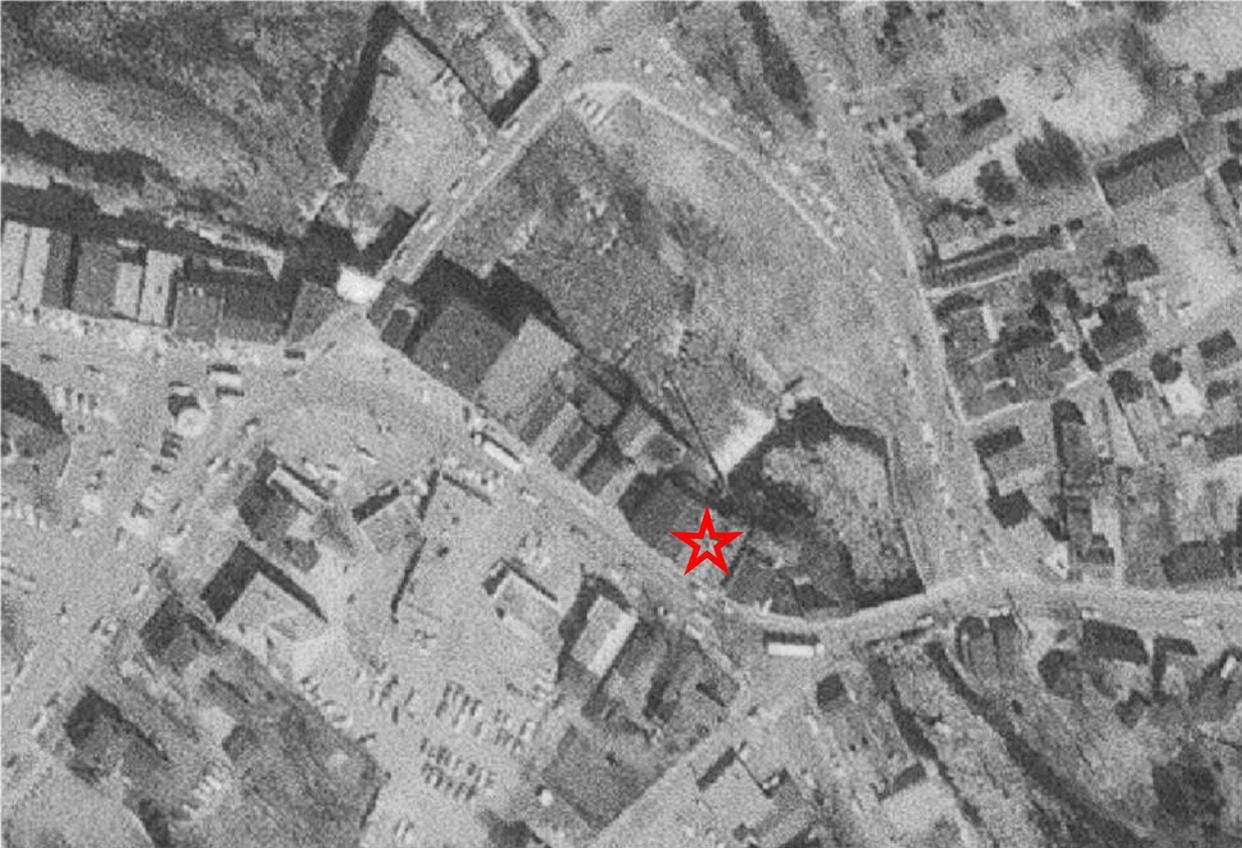

The 1960s Orthophotograph depicts the property as an improved for commercial use. The property vicinity is depicted as densely populated mixed residential and commercial use.

Figure 5 – 1960s Orthophotograph

The 1973 Orthophotograph depicts the property as an unimproved lot. The property vicinity is depicted as densely populated mixed residential and commercial use.

Figure 6 – 1973 Orthophotograph

3.5 Sanborn Fire Insurance Maps

A review of Table 4 reveals that Sanborn Fire Insurance Map coverage for the property was identified in 1885, 1892, 1898, 1904, 1913, 1924, and 1943. The Sanborn Fire Insurance Maps depict the subject property as improved for commercial use dating back to at least 1885. See Appendix B for details.

TABLE 4 - Sanborn Fire Insurance Maps

ADDRESS	DATE	PROPERTY USE	PROPERTY VICINITY
23 Water	1943	Commercial	Commercial & Residential
23 Water	1924	Commercial	Commercial & Residential
23 Water	1913	Commercial	Commercial & Residential
23 Water	1904	Commercial	Commercial & Residential
23 Water	1898	Commercial	Commercial & Residential
23 Water	1892	Commercial	Commercial & Residential
23 Water	1885	Commercial	Commercial & Residential

3.6 City Directories

A review of Table 5 reveals that city directories were available for the site and vicinity. The property was occupied by commercial use tenants from at least 1927 to 1960. Tenants in possession were not identified from 1960 to 2020. See Appendix E for details.

TABLE 5 – City Directories

None Identified	23 Water	None Identified	None Identified

4.0 STANDARD ENVIRONMENTAL RECORDS DATABASE EVALUATION

Environmental records were reviewed electronically utilizing a database search from a leading third-party specialist. ASTM and AAI search criteria were utilized in preparing the database search, including recommended search radii.

115 Environmental Records were identified within ASTM search radii. 62 of these records are for 37 addresses located within 0.25 miles of the property. None of these Environmental Records are for the property. Five (5) of the addresses are potentially hydraulically connected to the property.

Permits are maintained by tenants in possession of 25 Water Street, Clifford & Franklin, 20 Franklin Street, and 12 Water Street to use, store, and generate oil and hazardous materials pursuant to the Resource Conservation and Recovery Act.

In December 1986, one (1) 4,000-gallon gasoline, three (3) 3,000-gallon gasoline, and two (2) 500-gallon capacity #2 fuel oil Underground Storage Tank (UST) were closed on 36 Water Street, which was occupied for commercial use by Water Street Gulf. During Underground Storage Tank removal activities, a release was identified. Remedial and assessment activities were conducted including contaminated soil excavation and subsequent disposal, subsurface investigation, media sampling and laboratory analyses from September 1994 to January 1996. An Initial Site Characterization Report/Tank Closure Report was filed with the NHDES by Lincoln Environmental, Inc. in January 1996. Based on available documentation, no further regulatory action is required, and the case is closed with NHDES (NHDES Facility ID# 0220267).

It is unlikely that the other addresses are hydraulically connected to the property. See Appendix D for details.

4.1 Environmental Permits

A Review of Table 8 reveals that environmental permits were not identified or reported for the property. See Appendix C and D for details.

TABLE 8 - Environmental Permits

DATE	ADDRESS	DESCRIPTION	AUTHOR / SOURCE
None Identified	23 Water	None Identified	None Identified

4.2 Environmental Complaints or Enforcement Actions

A Review of Table 9 reveals that Environmental Complaints or Enforcement Actions were not identified or reported for the property.

TABLE 9 - Environmental Complaints or Enforcement Actions

DATE	ADDRESS	DESCRIPTION	REGULATORY PROGRAM
None Identified	23 Water	None Identified	None Identified

5.0 ENVIRONMENTAL SETTING

5.1 Topography & Hydrology

A review of the 1973 USGS Topographic map reveals topography in the property vicinity is relatively flat, gently sloping from the southwest to the northeast. The Squamscott River is located to the north and northeast. Therefore, based upon topographic and surface water features, groundwater in the property vicinity likely flows from the southwest to the northeast and discharges into the Squamscott River.

FIGURE 8 – 1973 USGS Topographic Map

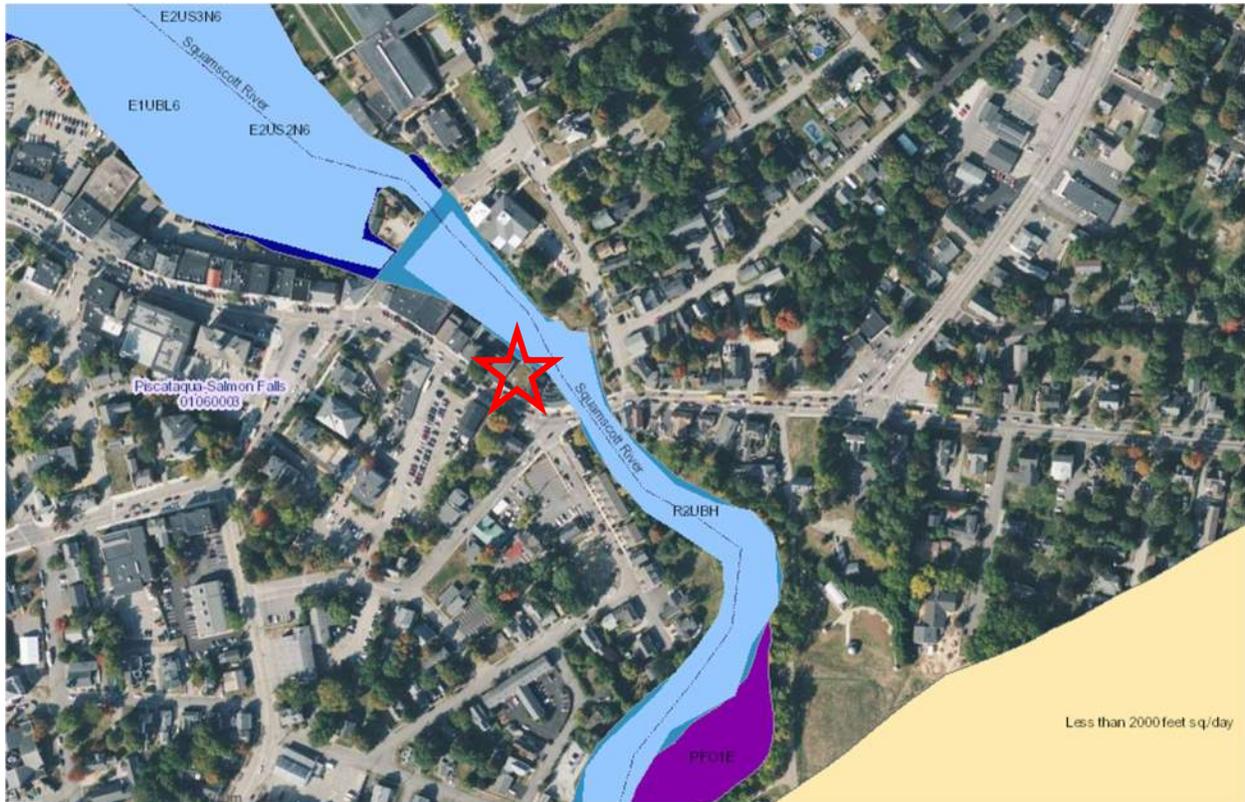

5.2 Surface Water

Surface water was not identified on the property.

5.3 Wetlands

Wetlands were not identified on or directly adjacent to the property.

FIGURE 9 – Wetlands Map

5.4 Bedrock Outcrops

Bedrock outcrops were not identified on the property.

5.5 New Hampshire Soil Remediation Criteria

Soil Remediation Criteria pursuant New Hampshire Code of Administrative Rules Part Env-Or 606 Section 19 applies to the property.

5.6 New Hampshire Ground Water Quality Criteria

Ground Water Quality Criteria pursuant New Hampshire Code of Administrative Rules Part Env-Or 603 applies to the property.

6.0 PROPERTY INSPECTION

The property inspection was conducted by Brent Tardif, Project Manager, Ardent Group, Inc. The property and surrounding grounds were inspected on 06/16/2022. Weather was partly sunny with temperatures in the 70° F range.

6.1 Roadways

The property has frontage on Water Street to the south.

6.2 Heating, Ventilation & Air Conditioning Systems

Heating, Ventilation & Air Conditioning Systems were not identified during the property inspection.

6.3 Hot Water

A Hot Water Supply was not identified during the property inspection.

6.4 Sanitary Waste Disposal

Sanitary Waste Disposal systems were not identified during the property inspection. The Town of Exeter Municipal Sewer System is available to service the property.

6.5 Potable Water Supply

A Potable Water Supply was not identified during the property inspection. The Town of Exeter Municipal Potable Water Supply System is available to service the property.

6.6 Underground Storage Tanks

A review of Table 10 reveals that Underground Storage Tanks were not identified or reported during the property inspection.

TABLE 10 - Underground Storage Tanks

CAPACITY	PRODUCT	STATUS
None Identified	None Identified	None Identified

6.7 Aboveground Storage Tanks

A review of Table 11 reveals that Aboveground Storage Tanks were not identified or reported during the property inspection.

11 - Aboveground Storage Tanks

CAPACITY	PRODUCT	STATUS
None Identified	None Identified	None Identified

6.8 Oil & Hazardous Materials

Oil and hazardous materials (OHMs) were not identified during the property inspection.

6.9 Solid Waste

Solid Waste accumulation was identified or reported during the property inspection. Metal, wood, plastic, cardboard, and assorted refuse were observed on the property.

6.10 Polychlorinated Biphenyls

Polychlorinated Biphenyls were not identified or reported during the property inspection. There are pole-mounted transformers located along Water Street. However, no transformers are labeled "PCB" or "PCB Containing".

6.11 Hydraulic Elevators or In-Ground Automobile Lifts

Hydraulic Elevators or In-Ground Automobile Lifts were not identified or reported during the property inspection.

6.12 Stained Surfaces

Stained Surfaces were not identified or reported during the property inspection.

6.13 Distressed Vegetation

Distressed Vegetation was not identified or reported during the property inspection.

6.14 Fill Material

Fill Material was not identified or reported during the property inspection.

6.15 Underground Structures

Underground Structures were not identified during the property inspection.

6.16 Floor Drains or Sumps

Floor Drains or Sumps were not identified or reported during the property inspection.

6.17 Grease Traps, Gas Traps, Or Oil Water Separators

Grease Traps, Gas Traps, or Oil Water Separators were not identified or reported during the property inspection.

6.18 Utilities or Appurtenances Not Otherwise Specified

Utilities or Appurtenances Not Otherwise Specified were not reported or identified during the property inspection.

6.19 Historic Soil Borings or Groundwater Monitoring Wells

Historic Soil Borings and Groundwater Monitoring Wells were not identified or reported during the property inspection.

6.20 Asbestos-Containing Material

There are no buildings located on the property, therefore there is little potential for asbestos-containing material on the property.

6.21 Lead-Based Paint

There are no buildings located on the property, therefore there is little potential for lead-based paint on the property.

6.22 Mold Conditions

Conditions conducive to mold growth were not identified or reported during the property inspection.

7.0 REFERENCES

A review of Table 12 reveals a number of references were utilized in conjunction with preparation of this report.

8.0 LIMITATIONS & CONDITIONS

This Environmental Assessment was completed consistent with professional practices established in the field of environmental science, the ASTM International Phase I Environmental Assessment Process ASTM E 1527-21, the ASTM International Phase II Environmental Assessment Process ASTM E 1903-19, United States Environmental Protection Agency 40 Code of Federal Regulation 312 Standards & Practices for All Appropriate Inquiries, United States Small Business Administration Standard Operating Procedure SOP 50 10 (5) I pursuant to Part 120 of Title 13 of the Code of Federal Regulations, Massachusetts General Laws Chapter 21E, 310 Code of Massachusetts Regulation 40.0000 The Massachusetts Contingency Plan, and MADEP Policy WSC-310-91 Standard References For Monitoring Wells.

Assessments are inherently limited in the sense that conclusions are drawn, and recommendations developed from limited inquiry and property reconnaissance. Accuracy and completeness of record information varies among information sources, including governmental sources. Record information is often inaccurate or incomplete. **Ardent** is not obligated to identify mistakes or insufficiencies in information. However, the environmental professional reviewing the record information would make a reasonable effort to compensate for mistakes or insufficiencies in the information reviewed that are obvious in light of other information, of which the environmental professional has knowledge.

The environmental professional conducting the property reconnaissance noted uses and conditions to the extent visually or physically observed during the property visit. Intrusive sampling and analysis of subsurface soil and groundwater, other than that specified, if any, are beyond the scope of this assessment. Subsurface conditions may differ from conditions implied by surficial observations.

Inquiry into historical Ownership of the property was performed in an attempt to determine property use. **Ardent** is not a professional title insurance firm and makes no guarantee, explicit or implied, that the listing, which may have been reviewed, represented a comprehensive delineation of past property Ownership or tenancy for legal purposes.

Conclusions regarding the potential environmental impact of properties within the approximate minimum search distance on the property are based on reasonably ascertainable and readily available information from the environmental databases and the assumed groundwater flow direction. A detailed file review of each facility is beyond the scope of work of this assessment. Actual groundwater conditions, including direction of flow, can only be determined through the installation of monitoring Wells and intrusive sampling and analysis.

Media sampling, screening and analysis operating procedures are inherently limited with respect to accuracy, representativeness, and repeatability. Completion of additional exploration, sampling, screening, and analysis could reveal novel conditions. This report does not warrant against conditions present of a type, or at a location not investigated. Additionally, the passage of time may result in a change in the environmental conditions at the property and adjoining properties.

Sampling and analysis for asbestos-containing material, lead-based paint, urea formaldehyde insulation, or radon gas was beyond the scope of the project. Should the existence of asbestos-containing material, lead-based paint, urea formaldehyde insulation, or radon gas be suspected, those areas should be treated as though they contained asbestos-containing material, lead-based paint, urea formaldehyde insulation, or radon gas until sampling and analysis can be performed.

APPENDIX B - SANBORN FIRE INSURANCE MAPS

FIRE
INSURANCE
MAPS

Project Property: ECLP-1608
11 & 23 Water Street
Exeter NH 03833

Project No: ECLP-1608

Requested By: Ardent Group, Inc.

Order No: 22060601319

Date Completed: June 07, 2022

Listed below, please find the results of our search for historic fire insurance maps from our in-house collection, performed in conjunction with your ERIS report.

Date	City	State	Volume	Sheet Number(s)
1943	Exeter	New Hampshire		2, 3, 5, 6, 7
1924	Exeter	New Hampshire		2, 3, 5, 6, 7
1913	Exeter	New Hampshire		12, 13, 5
1904	Exeter	New Hampshire		10, 8
1898	Exeter	New Hampshire		2, 3, 4
1892	Exeter	New Hampshire		2, 3, 4
1885	Exeter	New Hampshire		1, 2

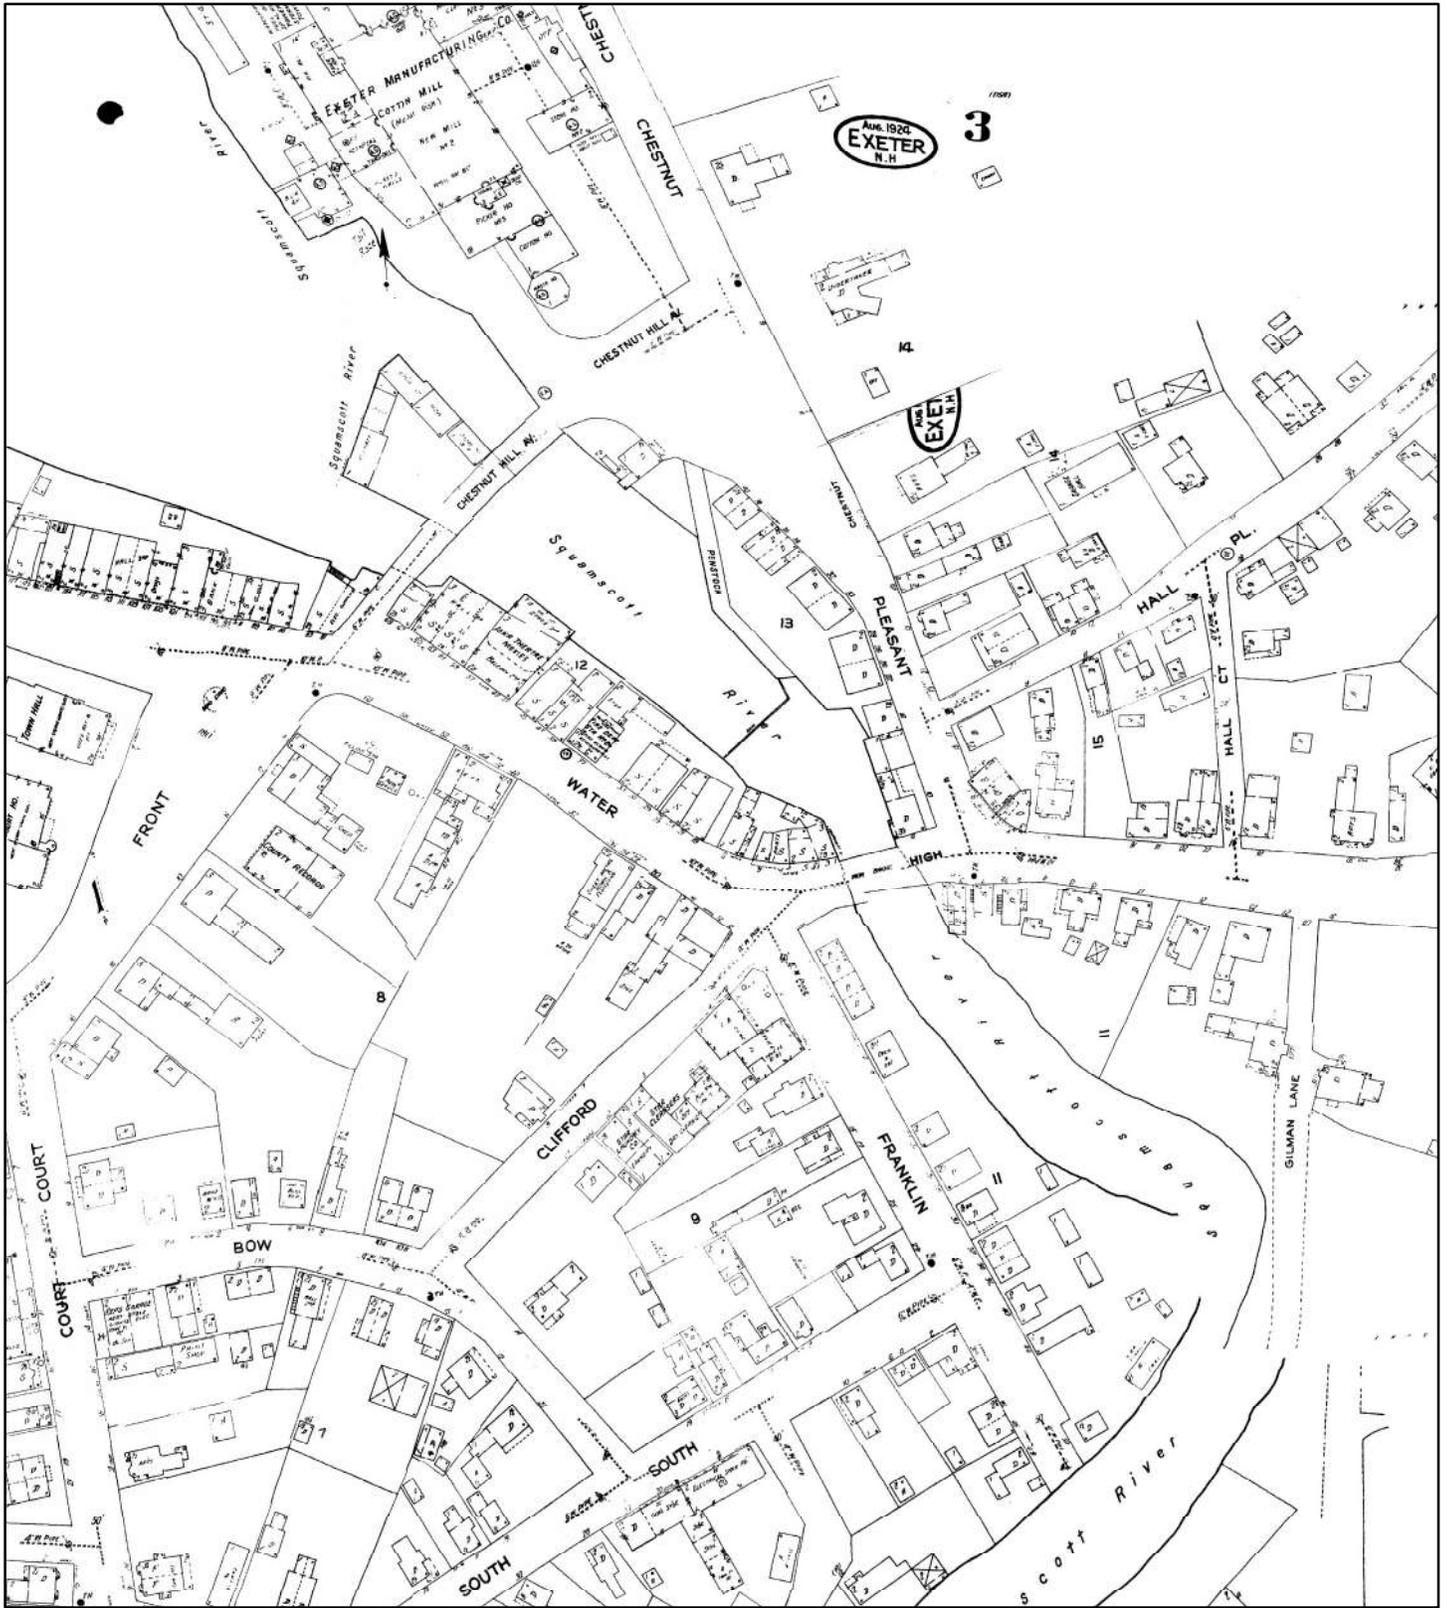

Individual Fire Insurance Maps for the subject property and/or adjacent sites are included with the ERIS environmental database report to be used for research purposes only and cannot be resold for any other commercial uses other than for use in a Phase I environmental assessment.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Description History:	The Site consists of on four (4) parcels of land currently owned by Towitall, LLC located at #1, #9, #19, and #20 Franklin Street in Exeter, New Hampshire. Three of the properties (#1, #19, and #20 Franklin) have buildings and the other property (#9) is a lot that is used to park equipment and vehicles (large tow trucks) related to the business. Based on the residential and small commercial makeup of the surrounding area, the Site was historically used for residential or small scale commercial operations. Plan #9557 (circa 1980) on file at the Rockingham Registry of Deeds revealed that #1 Franklin Street was formerly operated as the "Car-go Home and Auto Centers, Inc.". The name Car-go Home and Auto Centers, Inc. appears in deed references for #1 Franklin till 1975. This plan also revealed that that #20 and #19 Franklin Street were formerly residences. Researched deeds indicate that #9 Franklin Street was formerly known as Wetherell's Garage (date uncertain). The following other names were noted in various records researched for the #1 Franklin Exeter Auto Mart (47'-54'), Philbrick Oldsmobile (54'-58'), Exeter Tire Center (66'-75'), and Mach I (82'->96'). This demonstrates a rich history of automotive repair use at these properties.

Description History: The Site is a 0.12-acre parcel of land located at the intersection of Court and Bow Streets in downtown Exeter, New Hampshire. The Site is a vacant gasoline filling station that ceased operation in 1997. One small kiosk-style pay station building is located in the approximate center of the parcel with fuel dispensers formerly located near the street corner. With the exception of the building location, the concrete dispenser pad area, and a small gravel area where some below grade piping was removed, the entire Site is paved.

Historical use records indicate that the Site was first developed as a residence sometime between 1802 and 1845. By 1874, the Site had been converted for carriage manufacturing, which may have included blacksmithing and/or painting. From at least 1885 until at least 1923, blacksmithing and/or painting is known to have been performed on the Site. As carriages were replaced with automobiles, the Site was converted to a garage and gasoline dispensing facility by 1924. Sometime after 1924 the building on the Site was razed and the existing kiosk-style building was constructed by 1964. The Site remained in use as a filling station until 1997 when the station ceased operation.

Ready for Reuse Ind: No

RE: CITY DIRECTORY RESEARCH
11 & 23 Water Street
Exeter, NH 03833

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

0-55 of Water Street

Search Notes:

APPENDIX F - ASTM E 1527-13 USER QUESTIONNAIRE

INTRODUCTION

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide the following information to the Environmental Professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Environmental Cleanup liens that are filed or recorded against the property (40 CFR 312.20)

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local laws?

Answer: None known.

Activity and land use limitations (AULs) that are in place on the property or that have been filed or recorded in a registry (40 CFR 312.20)

Are you aware of any Activity and Use Limitations, such as engineered controls, land use restrictions or institutional controls that are in place at the property?

Answer: None known.

Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protection (40 CFR 312.20)

As the user of the Environmental Property Assessment, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Answer: None known.

Relationship of the purchase price to the fair market value of the property if not contaminated (40 CFR 312.20)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known to be present at the property?

Answer: None known.

Commonly known or reasonably ascertainable information about the property (40 CFR 312.20)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example, as the user,

Do you know the past uses of the property?

Answer: Yes, commercial retail and commercial automotive parts retail and repair services.

Do you know of specific chemicals that are present or once present at the property?

Answer: Yes, materials include those typical of motor vehicle service, including motor oil, waste oil, waste antifreeze, and lubricants.

Do you know of spills or other chemical releases that have taken place at the property?

Answer: None known.

Do you know of any environmental cleanups that have taken place at the property?

Answer: None known.

The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.20)

As the user of the Environmental Property Assessment, based upon your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination on the property?

Answer: None known.

APPENDIX G - ENVIRONMENTAL PROFESSIONAL RESUME

JOSEPH F. DORSETT, JR.

Ardent Group, Inc. (Ardent)
Environmental & Energy Solutions, Inc.
KEY Environmental Services, Inc. (KEY)

1993 - Present

The firm's benchmark is providing environmental services in a fashion that quickly and economically removes impediments to critical business transactions.

The firm was established in 1993 by a number of environmental professionals with whom Joseph had a lengthy professional history. The firm is a full service environmental firm that offers experience and references for projects requiring environmental due diligence, hydrogeological investigation, health risk characterization, waste remediation, waste water treatment, waste disposal, wetland science, forest management, endangered species consultation, lead paint and asbestos consulting. With the buyout of his 17-year partners, Joseph became the sole shareholder of KEY. The name change to E&E was part of that agreement.

President

Joseph's principal responsibility is to leverage his experience in completing over 7,000 projects to ensure that the firm delivers environmental services in a fashion that maximizes the client's asset value. His secondary responsibility is to broaden the firm's client base.

ATEC was organized in 1958 and was the nation's 20th largest environmental engineering firm grossing over \$150 million dollars in 1993. Prior to 1985, the Corporation concentrated in Geotechnical and Materials Engineering Services, and diversified into Environmental Engineering Services during the mid-1980s. Joseph established the New England District in 1988 with gross sales reaching \$7.5 million dollars in 1993.

Vice President & District Manager

Advancement to Vice President was a result of fostering the corporation to: be client driven, be focused upon quality, develop human resources, and diversify into Environmental Construction Services.

Associate & District Manager

1991 and 1992 were prominent years for the New England District. A system to bid and execute multi-million-dollar Department of Defense Environmental Construction contracts was developed and subsequently integrated with traditional service offerings.

The corporation had no significant cost estimating, cost accounting, or project management systems to render Environmental Construction Services. With Joseph's assistance ATEC developed systems to meet this need in-situ and real time. Joseph disseminated these systems to other Districts with informal training sessions.

Joseph established a multi-trade Environmental Construction work force, directed development and training of specialized professionals within the Environmental Engineering Team, and the Administrative Team was augmented to include Contract administration expertise. The District grew from 12 to 55 Team Members.

District Manager

Joseph solicited multiple national environmental service corporations to finance the establishment of a New England based District Office. ATEC was selected as employer of choice. Joseph organized a base of operations and produced return upon investment within 15 months. Project management, technical management, marketing, sales, contract negotiations, recruiting, professional development, facility management, and significant accounting activities were directed at the District level.

The BSC Group, Inc. (BSC)

1986 - 1988

BSC established a Hudson New Hampshire operations base with the acquisition of Loring Jacobs Company in the 1970s. Loring Jacobs Company was one of New England's oldest and largest land surveying companies. The client base was predominately composed of land developers with surveying and civil engineering needs.

Division Manager

Joseph negotiated to establish BSC's Environmental Services Division profit center in 1986. The Division specialized in Hazardous Material Consulting, and Resource Area Planning Services. Technical judgments were discharged by Joseph and he was accountable to maintain adequate levels of contract backlog, determine pricing, and collect receivables.

Certified Engineering and Testing, Inc. (CETCO)

1986

CETCO was established by four professionals from Briggs Associates, Inc. with the goal of securing a percentage of the growing environmental engineering market. The corporation specialized in hazardous material investigation, asbestos investigation, and analytical services.

Project Manager

Joseph executed field investigations, wrote technical reports, and interfaced with the client. Joseph's technical reports were heavily scrutinized by clients, attorneys, regulators, and other interested parties.

General Dynamics, Inc. Quincy Shipbuilding Division (GD)

1984 - 1986

GD is the United States' second largest defense contractor manufacturing a host of defense related hardware. The Quincy Shipbuilding Division manufactured five \$65 million-dollar Military Pre-positioning Ships during Joseph's tenure. The facility was 200 acres and 60% under roof with 7000 employees working three shifts per day. The facility was established in the 1800s by Alexander Graham Bell's assistant, Watson, who manufactured steam engines and subsequently ships in Pepperell's Fore River basin.

Environmental Engineer

As the Environmental Engineer at a historical, large, heavy manufacturing facility, Joseph was challenged with management responsibility early in his career. Maintenance of numerous environmental permits was extraordinarily complex. An Emergency Response Team was fully equipped, trained, and on-call. Environmental Standard Operating Procedures were improved and enforced. The facility was one of New England largest generators of hazardous material. The facility was closed in 1986 that was a full-time project itself. The Executive Board's instructions were to fully investigate and remediate all potential environmental impairments. The facility closure was a landmark case for the New Hampshire Department of Environmental Quality Engineering.

Chemistry Technician

Responsibilities of a Chemistry Technician at the Quincy Shipbuilding Division included material quality control, health and safety inspection, and field sampling / calibration duties. A Technician was on duty 24 hours per day 7 days per week to perform safe hot work and confined space entry field inspections.

Education

Master of Education, Hudson State College; 1986

Bachelor of Science, Stonehill College; 1984

High School Diploma, Scituate High School; 1980

Licenses & Certificates

MA Construction Supervisors License, Unrestricted; 2007

MA Hoisting Engineer License, Class 2; 2000

MA Industrial Waste Water Treatment Plant Operator License, Grade 2; 2000

MA Title V Septic System Inspector License; 1995

OSHA 40-Hour HAZWOPER Certificate; 1991

Certified Confined Space Entry Technician; 1984

Certified Nursing Assistant; 1980
